Education

Year	Degree	Institute	GPA/%
2024–2028	B.Tech	Delhi Technological University (DTU), New Delhi	8.25
2023	12th CBSE	New Modern Public School, Bihar	88%
2021	10th CBSE	Vidya Vihar Residential School, Bihar	94%

Technical Skills

Programming:	C/C++, Python, JavaScript, TypeScript, SQL
Backend:	Node.js, REST APIs, WebSockets
Frameworks:	React.js, Next.js, Flutter
Core CS:	Data Structures, Algorithms, OOP, Operating Systems, Computer Networks, DBMS
Databases:	PostgreSQL, MongoDB, Firebase
Tools:	Git, GitHub, Linux, Docker

Work Experience

Full Stack Developer, FocusDesk Jun 2026 – Present

- Developed **microservices** using **Node.js**, **PostgreSQL**, and **REST APIs** supporting user authentication, session orchestration, and real-time platform workflows
- Integrated **Redis caching** for frequently accessed data, reducing **API latency by 30%** (from ~200ms to ~140ms) while improving backend responsiveness and system throughput under concurrent load
- Designed backend workflows for **user management**, session orchestration, and platform reliability

Full Stack Developer, TripXpay May 2025 – Sep 2025

- Built platform features using **Next.js**, **Firebase**, including **E-KYC** workflows and credit transactions
- Developed **5+ backend services/modules** and schemas for efficient querying and secure interactions
- Migrated React to **Next.js with SSR**, improved SEO, optimized performance, and resolved multiple production-level issues across core user and admin workflows

Projects

Deep Packet Inspection System | [GitHub](#) C++, Multithreading, Networking

- Built **DPI engine** processing **8K+ packets/sec**, parsing **L2–L7 protocols** from PCAP traffic
- Designed **multi-threaded pipeline**, boosting **throughput by 35%** and cutting latency by ~18ms
- Implemented **TLS SNI extraction** and rule-based filtering for efficient traffic classification

Pic2Pick (Image Similarity System) | [GitHub](#) Python, CLIP, FAISS

- Built **CLIP + FAISS** semantic search system for scalable similarity search across large image corpora
- Optimized retrieval pipelines, reducing **latency by 30%** (from ~480ms to ~340ms) for faster searches
- Improved **matching accuracy** via efficient feature extraction and dataset preprocessing

ECOSHALA (Gamified Learning Platform) | [GitHub](#) React, Firebase, JavaScript

- Engineered a **full-stack gamified learning platform** with authentication, leaderboards, progress tracking, achievement systems, and real-time user engagement workflows
- Integrated a **Gemini-powered chatbot** and adaptive quizzes for personalized learning support
- Built scalable data models using **Firebase Firestore** for activity tracking, rewards, and analytics

Achievements

- Winner, National Project Competition** organized by **ISRO** (2023) | [Certificate](#)
- Dell Aspire Scholar:** Merit-based MSDF-backed scholarship, mentorship, and career support.
- Talerang'26 25 Under 25:** Awarded for innovation, including an ISRO win and ECOSHALA.
- Core member of EHAX - DTU's Cybersecurity Society; co-organized EHAX CTF with 2,000+ participants and achieved **India Rank 7** and **World Rank 33** on CTFtime.
